

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24825

Stream : St. Marys River

Applicant : Stanley G Fuhrmann
10544 North 350 West
Decatur, IN 46733-9794

Description : A confined feeding operation will be constructed within the floodway of the St. Mary's River. Approximately 250' x 100' area will be cleared of top soil and dredged approximately 4' deep. This will facilitate the construction of a 212' x 82' x 8' concrete manure storage pit. The concrete floor will be constructed 4' below the normal grade level and walls will be created to a height of 8'. Fill material dredged from the site will be used to fill along the constructed manure storage pit. Details of the project are contained in information and plans received at the Division of Water on May 1, 2008.

Location : Approximately 1460' north and 330' west of the 36½ West Road stream crossing and continuing 212' west and 82' north
DOWNSTREAM: near Decatur, Preble Township, Adams County
SW¼, SE¼, NW¼, Section 12, T 28N, R 13E, Decatur Quadrangle
Quad Code: 4008478
UTM Coordinates: Downstream 4529412 North, 667634 East
UPSTREAM:
UTM Coordinates: Upstream 4529390 North, 667634 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

30 Day Public Notice Report

Application # : FW-24831

Stream : Locust Creek

Applicant : Mill Creek Estates
Howard Wells
1220 East Riverside Drive
Evansville, IN 47714-4164

Description : A detention pond will be created to control stormwater runoff from an existing mobile home park. An earthen berm will be constructed around the perimeter of the pond. The berm will have a maximum top width of 6' with 3:1 side slopes on the streamward side. The basin outlet will be a 36" pipe and will terminate at the stream with a concrete end section that will conform to the streambank. A flapgate will be placed at the outlet with approximately 200 square feet of riprap over geotextile fabric. An emergency overflow spillway will be constructed through the proposed detention pond berm. A 12' by 21'-4" pump house will be an addition to an existing concrete pump pit and will be placed east of the pipeline. An approximately 1,500' levee will be constructed along the streamward side. Additionally, fill will be placed at grade for a proposed parking lot. Details of the project are contained in information and plans received at the Division of Water on May 2, 2008.

Location : Mill Creek Estates Mobile Home Park; along the west (right) stream bank, beginning approximately 550' upstream of the Mill Road stream crossing and continuing upstream approximately 1,150'
N 38 degrees 01' 34" W 87 degrees 35' 36"
DOWNSTREAM: near Evansville, Center Township, Vanderburgh County

30 Day Public Notice Report

Application # : FW-24838

Stream : Sanes Creek

Applicant : McFall Family LLC
Flossie McFall
6533 West Johnson School Road
Connersville, IN 47331-8645

Description : Approximately 135' of Sanes Creek will be realigned and straightened to return the channel to the original alignment. Realignment will consist of removing sand and gravel deposits from the channel and placing the material against the western bank to prevent erosion. Details of the project are contained in information and plans received at the Division of Water on May 13, 2008.

Location : Approximately 1750' upstream of the County Road 750 South stream crossing near Connersville, Orange Township, Fayette County
NE¼, NE¼, NE¼, Section 35, T 14N, R 11E, New Salem Quadrangle
Quad Code: 3908553
UTM Coordinates: Downstream 4377956 North, 649471 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Application # : FW-24843

Stream : Sand Creek

Applicant : Clifford Bengé
5879 South County Road 60 Southwest
Greensburg, IN 47240-9656

Description : Approximately 447' of Sand Creek's bank will be stabilized with riprap. A gravel bar will be removed and the excavated material will be used as bedding underneath the riprap. Trees and other debris will be removed from the creek as well. Details of the project are contained in information and plans received at the Division of Water on May 15, 2008.

Location : At the confluence of the Unnamed Tributary to Sand creek and continuing downstream approximately 447'
DOWNSTREAM: near Greensburg, Sand Creek Township, Decatur County

30 Day Public Notice Report

Application # : FW-24845

Stream : Wabash River

Applicant : *Indiana Department of Transportation
Richard L Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : The existing bridge deck and railing on the northbound structure carrying I-69 over the Wabash River. Bearings and mud walls at the end bents will be removed and semi-integral end bents will be constructed. Shear studs may be installed on the existing girders and stringers to replace studs damaged by deck removal operations. Riprap turnouts are to be placed at the bridge corners and down the side slopes. Riprap will not be placed around the piers or on the spill slopes. Guardrail will be removed and new guardrail installed on the approaches. Approach slabs, terminal joints, and a portion of the pavement will be removed to accommodate new approach slabs and terminal joints. No painting, structural steel, or bearing work is anticipated. No riprap will be placed below the Q-100 elevation. Details of the project are contained in information and plans received at the Division of Water on May 15, 2008.

Location : At the I-69 crossing of the Wabash River
near Markle, Rock Creek Township, Huntington County
Section 2, T 27N, R 10E, Markle Quadrangle
Quad Code: 4008573
UTM Coordinates: Downstream 4519900 North, 637993 East

30 Day Public Notice Report

Application # : FW-24847

Stream : Ohio River

Applicant : Indiana Michigan Power Company
Sharon S. McFarland
800 AEP Drive
Lawrenceburg, IN 47025-2510

Description : An approximate 20 acre area in the north floodplain of the Ohio River will be used as a construction material borrow area for a previously approved fly ash landfill project at the Indiana Michigan Power Tanners Creek Power Plant. Approximately 160,000 cubic yards of material excavated from the proposed borrow area will be used in the construction of the fly ash landfill. Areas within the borrow area footprint will be seeded with a mixture of native grasses, sedges, and forbs. Other disturbed area will be seeded with native grasses upon completion. Appropriate sediment and erosion control methods will be implemented and maintained during construction, including seeding and placement of erosion control blankets on disturbed berm slopes that are greater than 3:1. When the borrow area has been fully excavated it will be drained to the Ohio River by way of a swale. Details of the project are contained in information and plans received at the Division of Water on May 16, 2008.

Location : Beginning approximately 350' upstream of the confluence of Wilson Creek & continuing approximately 1850' upstream to the east. The project is located on the Indiana Michigan Power Tanners Creek Power Plant near Lawrenceburg, Lawrenceburg Township, Dearborn County

Stream : Big Blue River

Applicant : *Indiana Department of Transportation
Richard L Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : Approximately 5300' of State Route 44 in the floodplain of Blue River will be resurfaced including the existing 4 span composite continuous steel girder bridge carrying State Route 44 over the stream. The existing structure will remain in place. The approach roads will be elevated a maximum of 1' above existing grade. Other improvements consist of placing fill along each side of the road to widen the shoulder and improve drainage. (Indiana Department of Transportation structure # 44-73-7698.) Details of the project are contained in information and plans received at the Division of Water on May 16, 2008.

Location : At the State Route 44 stream crossing
near Shelbyville, Shelby County
Lewis Creek Quadrangle
Quad Code: 3908547

Application # : FW-24851

Stream : Sugar Creek

Applicant : *Indiana Department of Transportation
Richard L Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : The existing single span steel truss bridge bridge over Sugar Creek will be replaced with a 3 span continuous, composite prestressed concrete bulb-T beam bridge. The proposed structure will have span lengths of 75', 100', and 75'. The side slopes will be armored with riprap over geotextile fabric. The existing structure will be completely removed. The approach roads will be elevated above existing grade. (Indiana Department of Transportation structure # 44-73-3332A.) Pipe extensions will be added to the existing concrete slab bridge carrying State Route 44 over Unnamed Tributary Sugar Creek. The existing structure will remain in place. (Indiana Department of Transportation structure # 44-41-6789.) In addition, approximately 6200' of State Route 44 in the floodplain of Sugar Creek will be resurfaced including the existing bridges carrying State Route 44 over Unnamed Tributary Sugar Creek, and Sugar Creek. Other improvements consist of placing fill along each side of the road to widen the shoulder and improve drainage. Details of the project are contained in information and plans received at the Division of Water on May 16, 2008.

Application # : FW-24852

Stream : Amity Ditch

Applicant : *Indiana Department of Transportation
Richard L Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : The existing 72' long pipe culvert carrying State Route 44 over Amity Ditch will be replaced with a new culvert system to reduce upstream flood damages. The new crossing will consist of a 18' wide by 6' tall by 75' long 4 sided reinforced concrete box culvert set in concrete headwalls. The culvert and headwalls will be skewed 27 degrees to align with streamflow. Minor channel shaping will occur both downstream and upstream of the new culvert to improve the flow transition at the crossing. The reshaped areas will be stabilized with layer of riprap over geo-textile fabric. The roadway will be elevated approximately ____' above the existing road elevations. The crown of the roadway over the new culvert will be at ____, NGVD. 631.25' of W-beam guardrails will be placed along each side of the roadway over the channel. Other improvements consist of resurfacing approximately 710' of State Route 44 in the floodplain of Amity Creek and placing fill along each side of the road to widen the shoulder and improve drainage. Details of the project are contained in information and plans received at the Division of Water on May 16, 2008.

Application # : NW-71

Stream : St. Joseph River

Applicant : Tim Croll
213 Livingston Bay Court
Mishawaka, IN 46544-3897

Description : A new glacial stone seawall will be constructed along 25' of the applicant's frontage to deter bank erosion. The new seawall will consist of 8 gauge sheet piling placed approximately 1' landward of the shoreline and glacial stone that will be placed waterward of the sheet piling. The new wall will be approximately 20" high, as measured from the channel bed at the shoreline. The piling will be driven approximately 40" into the riverbed. Fill will be brought onsite to backfill the area landward of the new seawall. The fill will be leveled with the top of the wall at the river and will be tapered back to existing ground elevations within the project site. Details of the project are contained in information and plans received at the Division of Water on May 19, 2008 and May 29, 2008.

Lake : Long Lake

Applicant : Mark Casper
50 East Ireland Drive
North Manchester, IN 46962-8606

Description : A new underwater beach was constructed in front of the property of the applicant on Long Lake for swimming. A 6 inch thick layer of clean, washed pea gravel will be added directly to the lakebed. The beach area will be 32 feet wide and have a maximum lakeward projection of 15 feet. A new seawall was constructed along approximately 118 feet of the frontage of the applicant on Long Lake to deter shoreline erosion. The wall is composed of glacial stone and is approximately 4 feet wide. Applicant is proposing to install plantings on the glacial rock already in place. Plants would be spaced approximately 12 to 18 inches apart in a "criss crossed" pattern. Plants would be one or a combination of the following: Arrow Arum, Blue Flag Iris, Chairmakers Rush, Great Blue Lobelia, Pickerel Weed, Rushes, Softstem Bulrush, or Sweet Flag, depending on availability. Details of the project are contained in information received electronically at the Division of Water on June 5, 2008 and in plans and information received at the Division of Water on
